

6 Easy Steps

to export your contacts from MailChimp to Constant Contact

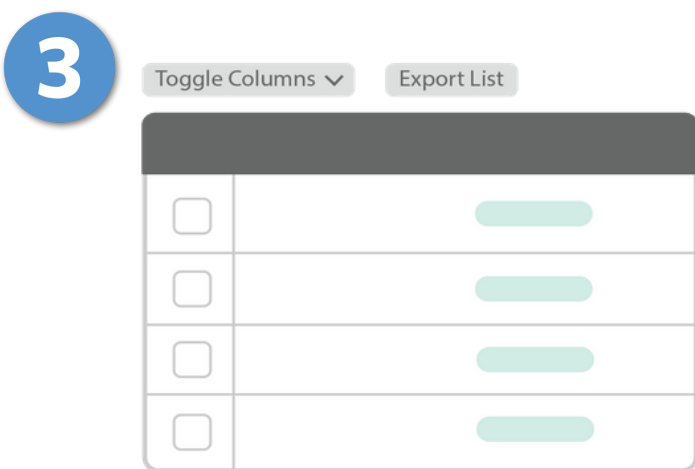

The first step of upgrading to Constant Contact is moving your contacts out of MailChimp. Take a look at the steps below to see how it's done.

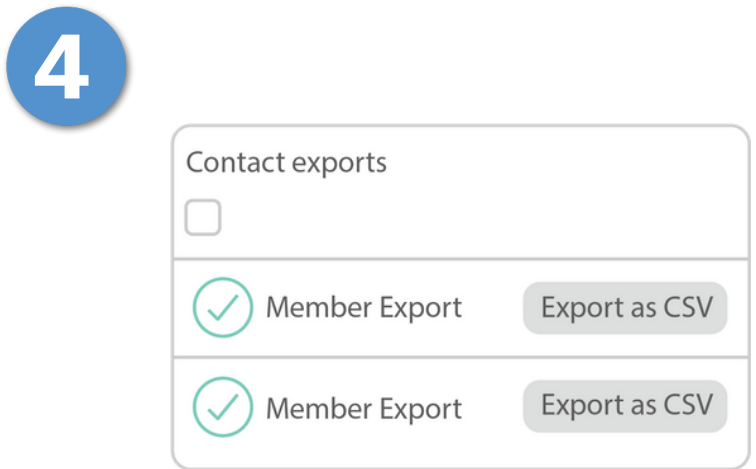

Log into MailChimp.

Click **Lists** and then click the name of the list you want to Export.

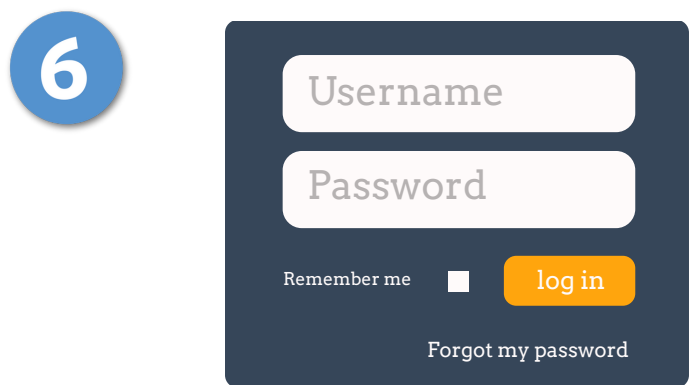

Click **Export List**.

Click **Export as CSV**.

Open the downloaded file and save it to your computer.

Log into Constant Contact and **import the file**.

Now that your contacts are imported, [create an email!](#) If you need help, check out our [Knowledge Base](#) for additional articles, tutorials, and guides.
